— WORK EXPERIENCE & PROJECTS —

- **Software Engineer, Talcott Resolution, Hartford CT** *June 2023 - Present*
 - Led design and development of full-stack applications using React and TypeScript for internal financial workflows, managing submission, validation, and lifecycle of business-critical data with version-controlled storage in SQL Server.
 - Designed and deployed a FastAPI-based orchestration service in Azure Container Apps that triggers on-demand container jobs to process data pipelines and generate Excel reports for actuarial workflows, enabling scalable, event-driven report generation.
 - Engineered modular Python pipelines to process high-volume financial datasets (XML, JSON, Excel), implementing data validation and transformation logic to support risk analytics and reporting workflows.
 - Optimized database performance through query tuning and indexing strategies, reducing latency and cutting processing time by ~30% in hedging workflows.
 - Connected frontend and backend systems to deliver end-to-end workflows, reducing manual steps and improving how business users interact with data.
 - Set up CI/CD pipelines for containerized services to automate builds, testing, and deployments across environments.
- **Software Engineer, Optum TDP, Boston MA** *January 2020 - June 2023*
 - Built Python data pipelines to process large-scale unstructured datasets (audio + metadata) used in analytics and machine learning workflows.
 - Ran AzureML experiments to train and evaluate speech recognition models, tracking performance and refining model outputs.
 - Automated batch workflows and deployments using Jenkins and Azure tools to ensure reliable execution and monitoring of data pipelines.

— ADDITIONAL PROJECTS —

- **Stock Trading Application** *2019 - 2023*
 - Developed Python-based trading system analyzing intraday market data and breakout signals, integrating real-time ingestion, placing orders, alerting, and strategy evaluation.

— SKILLS —

- **Languages:** Python (7 yrs, Pandas, NumPy), SQL (6 yrs), Java (4 yrs), JavaScript (4 yrs)
- **Cloud & Tools:** Azure, Docker, Kubernetes, Jenkins, GCP, AutoSys, Unix/Linux

— EDUCATION —

Education: B.S. Computer Science, **Worcester Polytechnic Institute (WPI)**
